

Student Information: Using Google Classroom

You are now logged in and have joined the correct year class for online learning. If you have not, please check the guides for **Logging in** and **joining a class**.

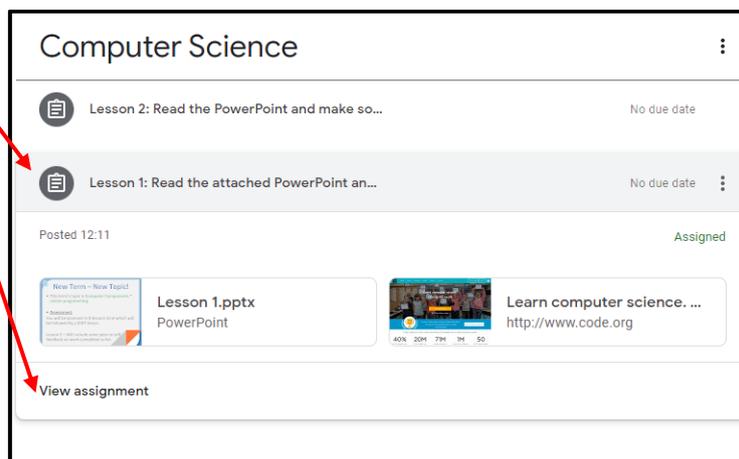

You are now able to see this page – for whichever year group you are in. My example is for a year 7. Start by clicking on **Classwork Tab** at the top. All work will be set within the **Classwork tab**.

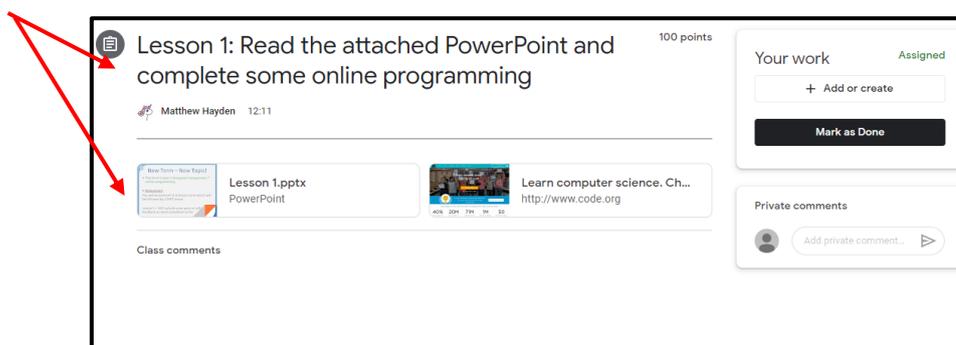

This will bring you to the main page with all your subjects down the left hand side, click on the subject to view the work which has been set.

Example: Clicking on Computer Science will display all the work which has been set. Newest lesson resources will appear at the top of that subject. Click on the Assignment and then **View Assignment** to view more detail about the task.

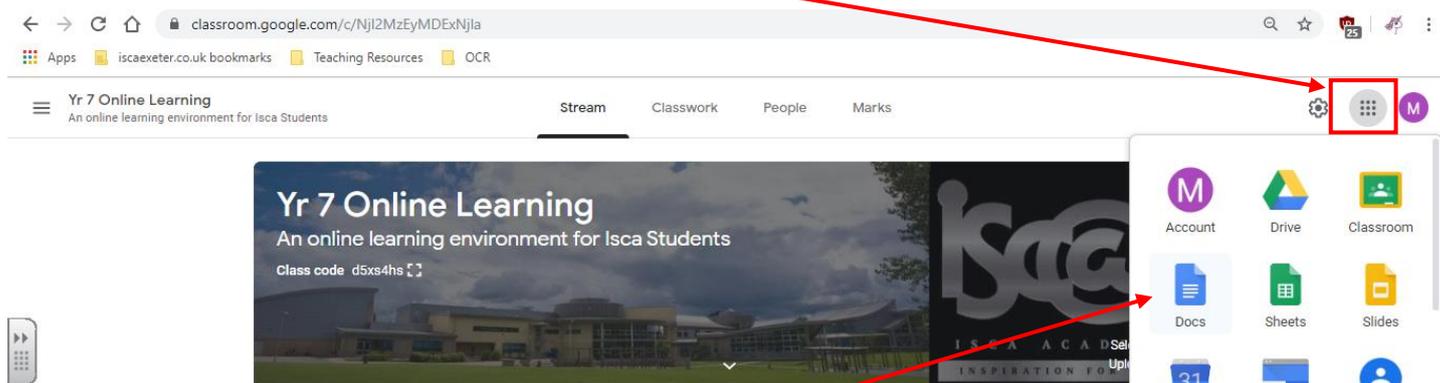

Task and instructions will be at the top. Any resources will be underneath.

Creating Documents

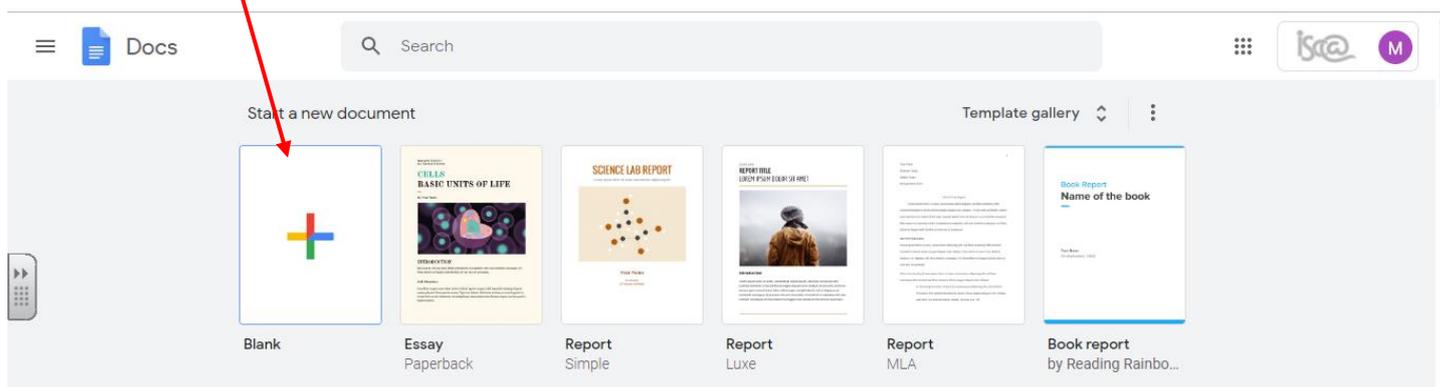

If you would like to be able to type into a Google Document because you do have access to paper or to workbooks at home.

Click on the 9 dots in the top right.

From here you can click on Docs

Then click the big Cross to create a blank Google Document so that you can type directly into your browser.

You can then give this a title at the top – and it will automatically save into Google Docs for you.
